EXPERIENCE

Software Developer : Aarohiinfo Information Technology Pvt.Ltd

(July2023 - December 2024)

- As a Junior .NET Developer, I contributed to the development and maintenance of software applications using the .NET framework.
- Collaborating with senior developers, I gained hands-on experience in coding, debugging, and testing software components.
- My role involved learning new technologies, adhering to coding standards, and assisting in the implementation of software solutions. Through this experience,
- I honed my skills in C#, ASP.NET, and SQL Server, while also developing problem-solving abilities and teamwork skills essential for success in software development.
- Experience with ASP.NET MVC or ASP.NET Core.Understanding of software testing principles and techniques.

Software Developer Intern: Aarohiinfo Information Technology Pvt.Ltd

(April 2023- June 2023)

- Collaborated with senior developers to integrate third-party APIs for enhanced functionality, such as payment gateways and shipment tracking systems.
- Contributed to troubleshooting and debugging efforts, identifying and resolving issues in the codebase to ensure smooth project execution.
- During my internship as a Software Developer at AIT , I had the opportunity to apply my theoretical knowledge to real-world projects and gain valuable hands-on experience in software development

PROJECTS

Real-Time Chatbox Application

- Developed a robust real-time chat application using ASP.NET MVC Core and SignalR.
- The project aimed to facilitate seamless communication between users by providing instant messaging capabilities within a web environment.
- Message Persistence: Enabled message history retrieval and storage to allow users to view past conversations.
- Notification System: Developed a notification system to alert users of new messages and updates in real-time.

Learning Management System (LMS)

- Collaborated with a team to develop a comprehensive Learning Management System (LMS) using MVC Core.
- The project aimed to create an efficient platform for managing educational courses, tracking student progress, and facilitating online learning.
- Course Management: Enabled administrators and instructors to create, update, and manage courses, including multimedia content and assessments.
- User Roles and Permissions: Implemented role-based access control to distinguish between students, Trainers, Content Creator and administrators.
- Enrollment System: Developed a streamlined process for student enrollment and course registration.
- Progress Tracking: Included features for tracking student progress, grading, and providing feedback.
